Portfolio Performance Report

Vikram

February 4 – April 30, 2026

EXECUTIVE SUMMARY

This report analyzes the performance of a student-managed equity portfolio over a three-month period from February 4 to April 30, 2026. The portfolio focuses on high-growth sectors including clean energy, fintech, and technology.

Over the period, the portfolio achieved strong unrealized gains driven primarily by clean energy equities, while also demonstrating active management through selective position exits.

Key Results:

- Final Equity Value: ~$131,800
- Unrealized Profit: +$26,200
- Realized Profit: –$4,410
- Net Performance: Strong overall growth

INVESTMENT STRATEGY

The portfolio follows a long-only equity strategy with a focus on:

- High-growth sectors (clean energy, fintech, emerging tech)
- Medium-term holding periods
- Active monitoring and selective rebalancing

Core holdings included companies such as BE, PLUG, BLDP, SOFI, AFRM, and DAL.

The strategy emphasized identifying sectors with long-term growth potential while maintaining diversification across industries.

MONTHLY PERFORMANCE BREAKDOWN

February (Feb 4 – Feb 29)

Portfolio Construction Phase

The initial phase focused on deploying capital across approximately ten equities. Positions were established gradually to manage entry prices and reduce timing risk.

Primary sector exposure included clean energy, fintech, and airline stocks. Performance remained close to cost basis as positions were newly established.

Key Insight:

Established a diversified base portfolio aligned with long-term growth themes.

March (Mar 1 – Mar 31)

Volatility and Position Holding

During March, the portfolio experienced mixed performance. Clean energy stocks such as BE and PLUG began to outperform, while fintech and airline positions showed weakness.

Despite volatility, positions were held to allow long-term theses to develop.

Key Insight:

Demonstrated discipline by maintaining positions during short-term fluctuations.

April (Apr 1 – Apr 30)

Active Management and Rebalancing

April marked the strongest performance period for the portfolio. Significant gains were observed in clean energy positions, contributing to overall growth.

Key Portfolio rebalancing (April 22):

- Sold:
    - ALGT
    - LUV
- Purchased:
    - BLDP - ~$12000
    - BE - ~~$12000

This reallocation reflects a strategic shift away from underperforming airline stocks toward higher - conviction clean energy positions. The increase allocation to BLDP and BE significantly contributed to portfolio gains in late April

Key Insight:

Showed active portfolio management through selective exits and sector reallocation.

PERFORMANCE ANALYSIS

Top Performing Positions:

• PLUG: +90.27%

• BE: +64.27%

• BLDP: +22.26%

Underperforming Positions:

• SOFI: –18.68%

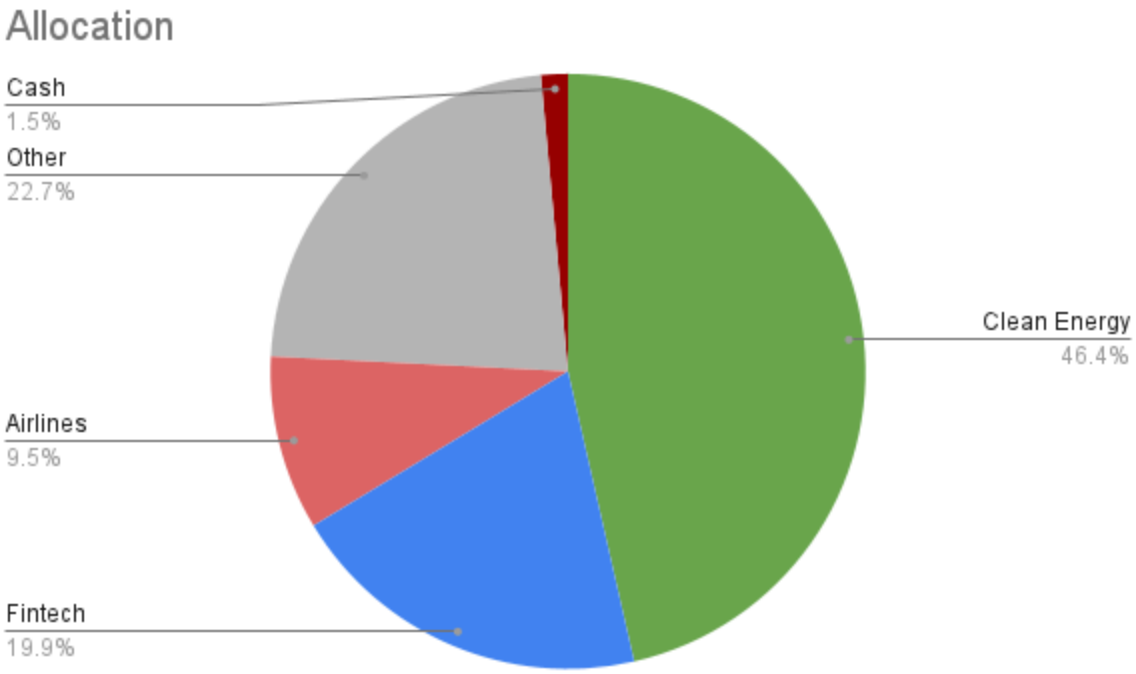

• UPST: –11.93%

• DAL: –4.39%

The majority of portfolio gains were driven by strong performance in clean energy equities.

The portfolio experience moderate volatility during Feb and Mar, followed by strong upward momentum in April. This growth was primarily driven by increased exposure to clean energy equities, particularly BLDP and BE, where approximately 12000$ was allocated to each position.

The portfolio was heavily weighted toward clean energy equities, with approximately $20,000 allocation to both BE and BLDP each. This sector concentration reflects a high-conviction strategy and was the primary driver of portfolio performance

---

KEY DECISIONS

• Maintained high-conviction positions in outperforming sectors

• Exited ALGT and LUV on April 22 to reduce exposure to weaker sectors

• Executed a sector rotation on April 22 by exiting airline position and increasing exposure to clean energy

These decisions contributed to improved portfolio efficiency and stronger overall returns.

LESSONS LEARNED

- Strong sector selection significantly impacts portfolio performance
- Risk management and earlier exits could improve overall returns
- Concentration in high-performing sectors can enhance gains but increases risk

---

CONCLUSION

Over the three-month period, the portfolio demonstrated strong growth and effective sector selection. The experience reflects the development of analytical thinking, risk awareness, and active portfolio management skills.

This project highlights practical engagement with financial markets and serves as a foundation for further exploration in investment management.
